Artyom Kazak – curriculum vitae

CV links: pretty[1] | plain[2] | PDF[3].

What I do

2017–now: founder of Aelve. I am managing Aelve Guide[4], a collaborative workspace for large research teams, and Aelve Codesearch[5], a regex-based code search engine.

2017–now: co-founder of Monadfix[6], a functional programming consultancy.

2018–2019: backend engineer at Wire[7]. The backend[8] is fully open-source and written in Haskell. I was involved with development, writing specs, doing prototyping for novel features, operations (Cassandra, AWS, Ansible, Kubernetes), and hiring.

2016–2018: software engineer at Serokell[9]. I was one of core developers of Cardano[10], a hugely successful cryptocurrency with dozens of devs on the team. I was involved in many architectural and design decisions, and wrote a substantial part of the codebase.

Contact me

- Telegram or Wire: @lightgreen
- consulting inquiries: hi@monadfix.io
- personal email: artyom@aelve.com

I speak English and Russian.
